

## IT Project Manager

**Tattarang** is one of Australia's largest private investment groups and is owned by the Forrest family. Our investment portfolio spans across agri-food, energy, resources, property, hospitality, sport and entertainment. The group is made up of six business divisions: Fiveight, Harvest Road, SFM Marine, Squadron Energy, Wyloo Metals and Z1Z. We believe in investing for growth and pursue opportunities in both the listed and unlisted space with a long-term investment horizon.

**Harvest Road Group** is part of Tattarang, one of Australia's largest private investment groups. We're an agricultural investment business with a growing portfolio of fine food brands for domestic and international markets, exporting to over 40 countries. An end-to-end producer, we guarantee that all our food is 100% traceable, sustainable and ethically produced, actively monitoring standards and controlling quality at every step. This is gate-to-plate farming at its very best and we're leading the way.

### About the role

As the IT Project Manager you are responsible for planning, overseeing and leading business technology projects from ideation through to completion. The position requires interaction with a range of internal and external stakeholders, often managing several projects simultaneously.

This role will require you to travel between metropolitan offices. Travel outside the metropolitan area will be required dependent on Project allocation

Your key responsibilities will include:

- Managing the full project life cycle and delivering digital solutions for the various companies within the Harvest Road group.
- Working with business customers to elicit high-level requirements and capture business needs; understand the customer journey and define user requirements.
- Defining and managing project scope, and the development of project management plans, ensuring the project is delivered on time and on budget, whilst adhering to quality standards and resourcing plans, including key dependencies.
- Managing stakeholder relationships, across multiple disciplines, teams and vendors.
- Utilising and assisting to develop existing IT PMO processes and methods.
- Promoting architectural consistency and usability standards; define and execute test cases.
- Ensuring appropriate change management processes are followed.
- Contract and vendor management

### About you

To be successful in this role you will have 7 or more years of progressively responsible IT experience, managing complex and risky projects successfully. You will have a solid track record of practical application of project planning/scheduling tools (for example, Microsoft Project and Open Workbench).

You will have a distinctive blend of business, IT, financial and communication skills, because this is a highly visible position with substantial impact. Knowledge of project management methodology and experience or familiarity with major, defined program management approaches (for example, PMI, Prince II or agile) is crucial. You will have significant knowledge of project planning/scheduling tools (for example, Microsoft Project and Open Workbench), with a solid track record of practical application. Above all you will be a professional, commercial, and pragmatic person with solid communication skills who enjoys working in a fast-paced environment.

## Next Steps

Please attach your resume and a short paragraph highlighting your relevant expertise.

*Tattarang and Minderoo Foundation embraces Equal Opportunity and promotes diversity. We actively encourage Aboriginal & Torres Strait Islanders, people of all backgrounds, ages, sexual orientation, and those with Disability to apply.*
